## How risky is it?

The value of the fund can go down as well as up. You could lose money. One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

## Risk rating

Franklin Templeton has rated the volatility of this fund as **low**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the Investment risk classification methodology section of the fund's simplified prospectus.

## No guarantees

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.

## How has the fund performed?

This section tells you how Series I securities of the fund have performed over the past 10 years. Returns are after expenses have been deducted. These expenses reduce the series' returns.

## A word about tax

In general, you pay income tax on your share of the fund's earnings and on any gains you realize from redeeming your investment. The amount of tax depends on the tax rules and rates that apply to you, and whether you hold the fund in a registered plan, such as an RRSP or TFSA.

If you hold the fund in a non-registered account, we send a tax slip that shows your share of the fund's earnings. You must calculate your gains on redemption.

## How much does it cost?

The following tables show the fees and expenses you could pay to buy, own and sell Series I securities of the fund. The fees and expenses – including any commissions – can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other series, funds and investments that may be suitable for you at a lower cost.

### 1. SALES CHARGES

Series I securities are only available under the initial sales charge option.

#### More about the trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the fund. It is for the services and/or advice that your representative and/or their firm provide to you.

Franklin Templeton pays the trailing commission to your representative's firm. It is paid from the fund's management fee and is based on the value of your investment. The rate is 0.400% of the value of your investment each year. This equals \$4.00 each year for every \$1,000 invested.

### 3. OTHER FEES

You may have to pay other fees when you buy, hold, sell or switch securities of the fund.

Fee	What you pay
<b>Switch fee</b>	Up to 2% of the value of the switched securities. You negotiate this amount with, and pay it to, your representative's firm. Your representative's firm may charge you a switch fee for the following: switches from securities bought under the initial sales charge option to securities without a sales charge or securities bought under the initial sales charge option.
